

# *A Different Way to Cover a Cake*

**Beth Schubert, Hastings Branch**

***Beth showed us a different way to cover a small (3 inch) cake quickly.***

Draw a 3 inch square then extend each side to equal the height of the cake. Cut out a cardboard pattern.

Using this pattern cut an icing pattern. Place cake onto the middle of the

square then turn cake and icing over, or place icing pattern on top of cake. Smooth side edges together. If too long cut off excess. Smooth the joins by crimping the edges or piping a snail trail or covering joins with an icing ribbon.
